PROFILE INFO

Electronics and Communication Engineering student with a strong interest in embedded systems, IoT, and web development. Possesses hands-on experience in building basic hardware and software projects. Seeking an opportunity to apply technical skills, learn practical concepts, and contribute to real-world engineering solutions.

EDUCATION

2025 - 2029

**NPR COLLEGE OF ENGINEERING
AND TECHNOLOGY**

- Electronic and communication engineering

**MSP SOLAI NADAR
MEMORIAL HR SEC SCHOOL**

- Higher Secondary (ClassX)
- 2023-Passed || 76.8%

**MSP SOLAI NADAR
MEMORIAL HR SEC SCHOOL**

- Secondary School (ClassXII)
- 2025-Passed || 80.33%

SKILLS

- Languages: C (Basic), Python (Basic), HTML/CSS (Basic)
- Embedded: Arduino, Sensor Interfacing, Arduino IDE
- IoT & Backend: Firebase (Auth, Firestore, Storage), EmailJS, ESP
- Core Areas: Embedded Systems, IoT Fundamentals, Hardware-Software Interfacing

PROJECTS

Back2You - Campus Lost & Found System | Web Application | IoT / Platform

- Designed and built a full-stack web platform to digitize campus lost-and-found management
- Implemented user authentication, item posting with image uploads, and claim request handling
- Used Firebase (Firestore, Auth, Storage) as the backend and EmailJS for automated notifications
- Reduced manual effort and improved item recovery speed through a streamlined digital workflow

Smart Mine Worker Safety Helmet + Rescue Rover | Embedded & IoT System | Conceptual Design

- Conceptualized an integrated safety system combining wearable IoT monitoring with autonomous rescue support
- Designed sensor-based hazard detection (gas, temperature, impact) with real-time emergency alert triggering
- Proposed wireless communication protocol between the helmet device and a remotely operable rescue rover
- Focused on improving worker survivability in underground and high-risk industrial environments

Habit Tracker - Daily Productivity Web App | Web Application

- Developed a basic web application to track daily habits and improve consistency
- Designed a simple user interface for adding, viewing, and managing habits
- Implemented functionality to mark habits as completed on a daily basis
- Used local storage / file import-export to save and retrieve user data
- Enabled users to export and import habit data for persistence

LANGUAGES

- Tamil
- English
